Question 1: Who is an “Assessee”?

SM / MAY 16

Solution:

As per sec 2(7), assessee means a person by whom any tax or any other sum of money is payable under the Income-tax Act, 1961.

In addition, the term includes –

1. Every person in respect of whom any proceeding under the Act has been taken for assessment of –
 - His income; or
 - The income of any other person in respect of which he is assessable; or
 - The loss sustained by him or by such other person; or
 - The amount of refund due to him or to such other person.
2. Every person who is deemed to be an assessee under any provision of the Act;

Question 2: State any 4 Instances where Income of the PY is assessable in PY itself instead of AY.

SM /

The income of an assessee for a PY is charged to income-tax in the AY. However, in a few cases, the income is taxed in the previous year in which it is earned. The exceptions are as follows:

1. **Non resident Shipping Business :** Where a ship, belonging to or chartered by a non-resident, carries passengers, livestock, mail or goods shipped at a port in India.
2. **AOP/ BOI formed for Short Duration:** If an AOP/BOI etc. is formed or established for a particular event or purpose and the AO apprehends that the AOP/BOI is likely to be dissolved in the same year.
3. **Closure of Business:** any business or profession is discontinued in any AY , the income of the period from the expiry of the PY up to the date of such discontinuance may, at the discretion of the Assessing Officer, be charged to tax.
4. **Person likely to transfer the property to avoid the tax:** it appears to the Assessing Officer that a person is likely to charge, sell, transfer, dispose of or otherwise part with any of his assets to avoid payment of any liability under this Act

Compute the marginal relief available to X Ltd., a domestic company, assuming that the total income of X Ltd. is ₹1,01,00,000 for AY 2026-27 and the total income does not include any income in the nature of capital gains. Assume that the company has not exercised option u/s 115BAA or 115BAB.	
[Note - The gross receipts of X Ltd. for the PY 2022-23 is ₹402 crore]	

Solution:

The tax payable on total income of ₹1,01,00,000 of X Ltd. computed @**32.1% (30% + surcharge @7%)** is ₹32,42,100. However, the tax cannot exceed ₹31,00,000 (i.e. the tax of ₹30,00,000 payable on total income of ₹1crore plus ₹1,00,000, being the amount of total income exceeding ₹1 crore). Therefore, the tax payable on ₹1,01,00,000 would be ₹31,00,000 + 4%. Final tax liability = ₹ 32,24,000.
The marginal relief is ₹ 1,42,100 (i.e., ₹32,42,100 - ₹31,00,000).
